

The Magic of Science		
	3-PS2-2	Make observations and/or measurements of an object's motion to provide evidence that a pattern can be used to predict future motion.
	3-PS2-3	Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other.
	3-PS2-4	Define a simple design problem that can be solved by applying scientific ideas about magnets.
	5-PS1-4	Conduct an investigation to determine whether the mixing of two or more substances results in new substances.
	MS-PS1-2	Analyze and interpret data on the properties of substances before and after the substances interact to determine if a chemical reaction has occurred.
	MS-PS1-3	Gather and make sense of information to describe that synthetic materials come from natural resources and impact society.
